MEDICINE AT CURTIN

The Curtin Medical School offers a five-year direct-entry Bachelor of Medicine, Bachelor of Surgery (MBBS) degree. This is the only undergraduate entry program in Western Australia.

WHAT CURTIN HAS TO OFFER

Curtin recognises the complex issues facing the Western Australian health system, its workforce and the need for more doctors to be “generalists” in their orientation. This means we are committed to producing graduates who are better equipped to meet community needs, with primary care expertise, strong leadership skills and the ability to operate effectively in interprofessional care teams.

The overall aim of the Curtin Medical School is to graduate doctors who are competent and ready to practice safely and effectively, with care and compassion for patients and their families. As a Curtin Medical School graduate, students will develop an understanding of medical and scientific knowledge; communication and clinical skills; skills as a health advocate; an awareness of ethical and professional responsibilities to patients; and strategies to cope with the challenges of medicine.

As a graduate of the course students will be well prepared to begin an internship and pursue further medical training in specialty fields.

The MBBS degree has an integrated curriculum requiring self-directed learning and draws on many disciplines to provide learning in a clinical context. From the commencement of the program, Curtin Medical School will offer clinical scenarios that provide the context for learning about the scientific foundations of medicine.

The Bachelor of Medicine, Bachelor of Surgery is accredited by the Australian Medical Council. All students will be registered with the Australian Health Practitioner Regulation Agency (AHPRA).

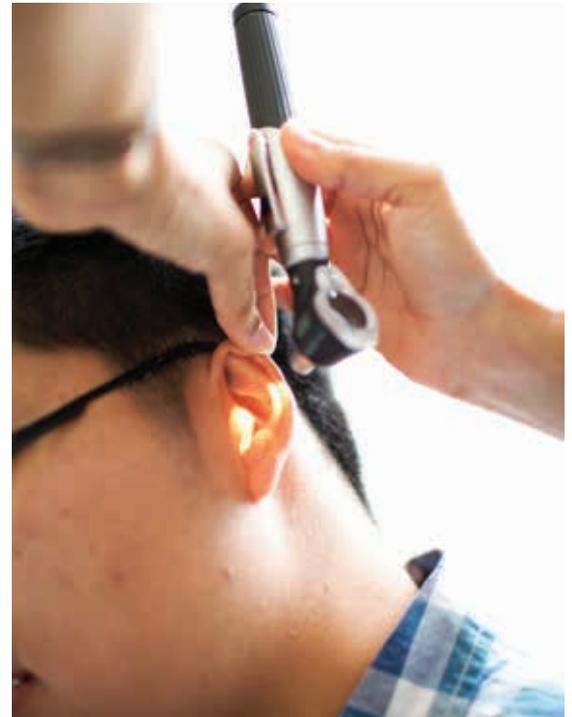

CURTIN MEDICAL SCHOOL DELIVERS:

- A medical curriculum that focuses on primary care, chronic conditions, aged care, mental health, indigenous health, population health and acute care.
- Interprofessional education and team based learning
- A concentration of clinical schools and new clinical placements in the underserved south-east metropolitan corridor and regional Western Australia.
- The development of competencies in patient safety, quality of care, leadership and management.
- A focus on the translation of evidence into clinical practice and health improvement.
- Engagement with the Faculty of Health Sciences’ research teams.
- An innovative learning model that uses the university’s technological expertise in simulation, distance learning and elearning, especially in rural and remote areas.
- Optional international student placements with partnered host institutions as part of the Curtin Go Global program.

CURTIN MEDICAL SCHOOL MISSION

With a strong emphasis on primary care, the mission of the Curtin Medical School is to position graduates well for rural and remote practice, as well as outer metropolitan locations, where there is a shortage of doctors.

MEDICINE AT CURTIN

MEDICAL REGISTRATION

After graduation and before being admitted to full registration as a medical practitioner in Australia, graduates receive provisional registration. Graduates will enter the workforce as an intern and must serve at least 12 months in an approved hospital. In the future, part of this training may be undertaken in general practice. The internship requires a series of rotations designed to expose you to a range of clinical situations and environments. This will provide further clinical training and help inform career choice. Medical students are registered with the Medical Board of Australia.

COURSE STRUCTURE OVERVIEW

The first year of the course is interprofessional and students will undertake units alongside other health sciences students as well as units specifically for medical students. In the early years of the course, the curriculum focus is upon building a solid foundation of scientific knowledge related to biological, clinical, epidemiological, social, and behavioural sciences. The early years also focus on developing communication skills and clinical skills. In addition, students are introduced to clinical practice in urban and rural settings, and legal and ethical aspects related to the practice of medicine.

Throughout the course, students will develop knowledge of the human body in health and disease, and an understanding about how this knowledge is applied in clinical practice. In the later years of the course, students undertake clinical placements in a variety of healthcare environments including general practice sites and hospitals. Students will have the opportunity to gain experience in rural healthcare.

The course is underpinned by four inter-related themes, integrated across the five years:

Theme 1: Scientific Foundations of Medicine

Knowledge of the biological, clinical, epidemiological, social and behavioural sciences underpinning medicine and clinical practice, and evidence-based practice.

Theme 2: Patient and Doctor: Clinical Practice

The clinical, procedural, and communication skills essential for clinical practice.

Theme 3: Health and Illness in Society

Knowledge of health systems, and the cultural, socio-economic and physical environmental factors that contribute to health and illness, disease and treatment at the population level.

Theme 4: Professional and Personal Development

Commitment to professional values and high quality clinical practice, including ethics, law and working as a member of an interprofessional health care team; and understanding of the importance of maintaining personal wellbeing.

CLINICAL PLACEMENTS

Students will have the opportunity to undertake clinical placements at Midland Hospital, Royal Perth Hospital, Fiona Stanley Hospital, Peel Hospital, Fremantle Hospital, general practice clinics across the state and rural medical settings.

Students undertaking clinical placements in the MBBS course are required to obtain the following:

- Criminal history clearance
- Working with Children Working with Children Check (2nd year requirement)
- First Aid Certificate (including CPR)
- Immunisations and health screening
- Hand hygiene training (online).

 curtin.edu/hs-fieldwork-requirements

COURSE ADMISSION CRITERIA

COURSE ESSENTIALS

MINIMUM ATAR 2018 95	DURATION 5 years full-time	STAT Not accepted	INTAKE February
UMAT* Minimum 50 on each construct	LOCATION Perth	STUDY MODE Full-time	CURTIN ENABLING COURSE** Not accepted

PREREQUISITES

Chemistry ATAR or equivalent
OR

- International Baccalaureate Chemistry at HL Grade 3.
- CHEM1003 Introduction to Chemistry and CHEM1005 Introduction to Biological Chemistry with a grade of 60 or higher in both units, offered through Curtin University.
- Completion of the Chemistry ATAR course with a final scaled score of 50 through North Lake Senior Campus or Cyril Jackson Senior Campus.

For queries regarding other equivalent subjects, please email CMSFutureStudents@curtin.edu.au

ENGLISH LANGUAGE REQUIREMENTS

students.curtin.edu.au/local/docs/English_List.pdf

DESIRABLES

One of the following Mathematics ATAR courses: Mathematics Applications, Mathematics Methods, Mathematics Specialist, or equivalent.

* With the exception of rural applicants who must achieve a minimum indicative total score of 150. Indigenous applicants are not required to sit the UMAT.

** with the exception of the Indigenous Pre-Medicine and Health Sciences Enabling Course

TARGET APPLICANTS

The degree is primarily for Western Australian school leavers who have completed year 12 or equivalent and do not have a higher degree record. Places will be prioritised for students from rural and regional areas, Indigenous backgrounds and students who have experienced long-term educational disadvantage. These students will receive additional weighting in the admission process in recognition of the historical and current disadvantage experienced by people from these groups accessing higher education.

In addition, a small number of places will be made available to Curtin course switchers and University graduates.

In 2019 a total of 80 places will be available.

New for 2019

Rural and equity students are eligible for up to 5 adjustment points to their ATAR.

For more information, see the entry pathways section.

WHO CAN APPLY

Applicants for the MBBS degree must be Australian citizens, Australian permanent residents or New Zealand citizens who have successfully completed year 12 with a Western Australian Certificate of Education (WACE) or an equivalent senior secondary qualification and have an Australian Tertiary Admission Rank (ATAR), or equivalent.

Applicants will be required to meet the MBBS specific academic standards including competency in English, Chemistry ATAR or equivalent and the minimum UMAT score of 50 on each of the three constructs. Entry into this course is very competitive. Meeting the minimum entry requirements does not guarantee an offer of a place, an interview or an offer of a place in the course.

School Leavers

School leavers are those who have completed year 12 or equivalent and have not commenced post-secondary studies (AQF Diploma or above) and do not have a higher degree record from any university. Applicants are deemed to have a higher degree record if they're enrolled past a University's census date for any given study period.

Mature age WACE applicants who want to study medicine as school leaver applicants are advised that they should study four ATAR courses in the one year. Applicants applying on the basis of fewer than four courses will not be considered for this course. Mature age WACE applicants must meet the school leaver criteria stipulated above.

Non-school Leavers: Graduates

Non school leavers (graduates) are applicants from any university who hold a completed tertiary degree record. All non school leavers (graduates) are required to apply through TISC and meet the minimum UMAT requirements. The minimum academic requirement for non school leavers with a completed tertiary degree record is:

- An minimum notional ATAR of 92.

The table below provides a guide on the grade requirements for each level of completed qualification.

Qualifications	Grade
Bachelor Degree	Distinction Average
Graduate Diploma	Credit Average
Postgraduate Diploma	Credit Average
Master Degree	Awarded
Doctorate	Awarded

Non School Leavers: Curtin Course Switchers**

A Curtin course switcher is an applicant who is enrolled in their first* course of study at Curtin. They must not have a tertiary record from any other Australian or overseas university or have already completed a degree at Curtin.

Applicants must have completed or be on track to complete a minimum of 200 credits of study at Curtin at the end of the year preceding admission. Applicants must not be in their final year of study and have a minimum of 200 credits remaining at the end of the year preceding admission. All Curtin Course Switchers applicants are to apply through TISC and meet minimum UMAT requirements.

Course switchers MUST commence the MBBS program in the first year of the course but may be eligible for Credit for Recognised Learning. The academic requirement for Curtin course switchers is:

- A minimum course weighted average (CWA) of 80.

* Students who have previously switched courses but otherwise meet these requirements will be able to apply as Curtin course switchers. In this case, the CWA will be calculated from all units completed.

** Students who are in their second year and beyond of Curtin's Optometry course are not eligible to apply as course switchers.

UMAT

All applicants* are required to achieve a minimum score of 50 in each section of the UMAT test. No adjustments or consideration will be given by Curtin University to applicants who do not meet the minimum UMAT requirements.

Applicants that require special testing conditions or are seeking test preparation materials are encouraged to visit the UMAT website for further information.

 umat.acer.edu.au

**Indigenous applicants are not required to sit the UMAT. Rural applicants do not need to achieve a minimum of 50 in each section of the test, only a total indicative score of 150.*

SPECIAL CONSIDERATION APPLICATIONS

The special consideration process is administered centrally at Curtin University. Curtin Medical School does not accept any applications for special consideration outside of the centralised university process.

The special consideration process can only provide a student between one and five additional points to their ATAR, if approved.

All applications and enquiries for special consideration are to be submitted to:

Email: ASCadmissions@curtin.edu.au before the relevant deadline.

 futurestudents.curtin.edu.au/undergraduate/flexible-entry/special-consideration

PROFESSIONAL BEHAVIOR REQUIREMENTS

Curtin Medical School students are expected to meet the professional behaviour standards of a medical student and as students proceed through the MBBS course, the standards of a medical doctor. Student progression from each academic year to the next is subject to both academic performance and professional behavior. It is possible that enrolment in the MBBS course can be terminated if professional behavior is not satisfactory. It is important applicants recognise this before accepting a place at Curtin Medical School.

 curtin.edu/hs-medicine-entry

INHERENT REQUIREMENTS

Studying medicine places substantial demands on students. It is important applicants considering studying medicine familiarize themselves with the inherent requirements of the course.

 curtin.edu/hs-medicine-entry

ENTRY PATHWAYS

RURAL ENTRY PATHWAY

Eligibility Criteria

Up to twenty-five per cent of places are allocated to Western Australian applicants from a rural background. Rural applicants are those who, as of 31 December prior to the commencement of the program, have spent at least 10 years cumulatively or any five years consecutively in an area with a Modified Monash Model remoteness category (MMM) 3-7 since the commencement of primary school. The time frame is based on the location of an applicant's primary residence.

Applicants who meet the Rural entry criteria will only compete for places with other eligible rural applicants.

To be classified as a rural student, applicants must be Western Australian school leavers, Curtin course switchers or have completed a tertiary qualification from a Western Australian University

Adjustment Schemes

Applicants eligible for a Rural place will be given additional weighting in the admissions process, up to a maximum of five additional adjustment factors to their ATAR, course weighted average or Notional ATAR, through either Curtin's StepUp Bonus Scheme or the Curtin Medical School's Rural adjustment scheme.

Rural applicants will only be eligible to receive adjustment factors (points) from one scheme. Adjustment factors will be capped at 99.95

Adjusted ATAR's

Please note that any adjustment factors from the Curtin Medical School Rural entry adjustment scheme are only applicable for entry into the Bachelor of Medicine/Bachelor of Surgery at Curtin University.

Proof Of Origin

Applicants will be required to submit documentation confirming their proof of rural background origin, to be completed by a recognised member of their community, confirming the applicant meets the criteria for this scheme.

Suitable persons to provide confirmation of rural eligibility include any APRHA licensed health practitioner such as: chiropractor, dentist, legal practitioner, medical practitioner, nurse, optometrist, pharmacist, physiotherapist or a person in one of the following categories: magistrate, minister of religion, school principal, Member of Parliament, police officer or veterinary surgeon.

Family members or a member of staff at Curtin University cannot complete the community confirmation declaration, even if they belong to one of the categories listed above.

How to apply

To be classified as a rural student, applicants must be Western Australian school leavers, Curtin course switchers or have completed a tertiary qualification from a Western Australian University, and complete the Rural and Equity application form (link below) declaring proof of rural background origin, obtain confirmation of eligibility from a recognised member of their community and sign that their application is "true and complete".

Applicants must submit the original form by email directly to the Curtin Medical School by the published deadline.

 The application form is available at: curtin.edu/hs-medicine-entry

EQUITY ENTRY PATHWAY

Eligibility Criteria

Equity places will be available to Western Australian school leavers from schools with an Index of Community and Socio-Educational Advantage (ICSEA) score of 1,000 and below averaged over three years.

These communities have a high concentration of students from disadvantaged backgrounds with limited numbers of students accessing higher education. These communities are also the target areas for increasing the supply of general medical practitioners.

Equity places are also available for applicants who are classified as experiencing financial hardship (they are receiving Youth Allowance, or their parent or guardian is receiving a Commonwealth Income Support or Commonwealth Means-tested Assistance Payment).

Applicants who meet the Equity entry criteria will only compete for places with other eligible Equity applicants.

Eligibility Criteria

Applicants eligible for an Equity place will be given additional weighting in the admissions process, up to a maximum of five additional ATAR points, through either Curtin's StepUp Bonus Scheme or the Curtin Medical School's Equity adjustment factors. Equity applicants will only be eligible to receive adjustment factors from one scheme.

Adjustment factors will be capped at 99.95

Adjusted ATAR's

Please note that any adjustment points from the Curtin Medical School Equity entry adjustment scheme are only applicable for entry into the Bachelor of Medicine/Bachelor of Surgery at Curtin University.

How to apply

Equity applicants must complete the Rural and Equity application form (link below) and submit the original by email directly to the Curtin Medical School by the published deadline.

 The application form is available at: curtin.edu/hs-medicine-entry

INDIGENOUS ENTRY PATHWAY

Eligibility Criteria

Places will be available to applicants of Aboriginal and Torres Strait Islander descent. Applying through CAS (Centre for Aboriginal Studies), applicants are not required to submit a TISC application, have an ATAR or sit the UMAT. Those applicants applying through the Indigenous Pre-medicine course are required to successfully pass all units in the course.

How To Apply

Applicants must submit the Indigenous Entry form (link below) via email by the published deadline. This should include supporting documentation which demonstrates that they have the motivation and academic capability to succeed in the MBBS degree.

 The application form is available at: curtin.edu/hs-medicine-entry

Interviews will be offered to competitive applicants. Applicants may be required to successfully complete the Indigenous Pre-medicine and Health Sciences Enabling Course prior to commencing medicine.

Curtin University reserves the right to audit any application documentation submitted in support of rural, equity or Aboriginal and Torres Strait Islander entry to the MBBS course.

APPLICATION PROCESS

HOW TO APPLY

(DOMESTIC APPLICANTS ONLY 2017-2021)

1 UMAT Registration

All applicants (other than Indigenous) must register to sit the Undergraduate Medicine and Health Sciences Admission Test (UMAT) before the application closing date. The UMAT exam is held nationally on a single date, in test centres across Australia as well as specified global locations.

Applicants are responsible for making their own arrangements to register for the UMAT. Please refer to the UMAT website, which explains the test in detail and sets out the procedures for registration including the fees payable, test centre procedures and regulations.

 umat.acer.edu.au

2 TISC Application

All applicants are required (including Curtin Course Switchers) required to apply through the Tertiary Institutions Service Centre (TISC) with the exception of those applying through the Curtin Centre for Aboriginal Studies (CAS).

TISC receives and processes applications for undergraduate degrees on behalf of the four public universities in Western Australia. The TISC application procedure allows applicants to list up to six courses in order of preference.

Applicants are advised to ensure their contact details as supplied to TISC are current as these are the details that will be used for all correspondence. It is the applicant's responsibility to ensure these details are kept up to date at all times through the selection process.

 tisc.edu.au

Change of Preference

A change of preference includes changing the order of the existing preferences in the TISC application. This can be done by going online after the application has been lodged on the TISC website.

Please note: **NEW** applications or preferences for the MBBS will NOT be considered after the closing date. Changes to the order of existing preferences, including the MBBS, must be done by the listed deadline*.

*Subject to TISC processing schedule – refer to TISC website

 tisc.edu.au

3 Predicted ATAR

All school leaver applicants (both Western Australian and interstate) are required to download the predicted ATAR form for their school principal to complete and return directly to Curtin Medical School by the published deadlines. Completed forms must be emailed from the school principal or authorised school representatives' email address.

A copy of the form will be emailed to applicants upon submission of a TISC application. The form will be sent to the email address provided within the application, please ensure that the email address provided is one that is checked regularly.

It is the responsibility of the applicants to ensure that their predicted ATAR form is submitted to the Curtin Medical School before the appropriate deadline. In particular, WA school leaver applicants must submit their predicted ATAR form by the listed deadline to ensure that they can be considered for an interview in December.

 For the predicted ATAR form visit:
curtin.edu/hs-medicine-entry

4 Rural/Equity/Indigenous Application Submission

Submit any special entry application by the published deadlines.

 For the relevant forms visit:
curtin.edu/hs-medicine-entry

SELECTION PROCESS

RANKING FOR INTERVIEW

Applicants are ranked and selected for interview based on the weighted sum of their academic merit score (ATAR or equivalent) and their UMAT score in the ratio of 60:40. Please note this course is a very competitive course with restricted places, meeting the minimum requirements does not guarantee you a place in the course.

Only shortlisted applicants will be contacted with an offer of interview.

THE INTERVIEW

The interview process provides an opportunity for short listed applicants to demonstrate how they communicate, critically appraise information and think about issues important to the medical profession.

The top ranked applicants from each entry pathway who meet the entry requirements will be invited to attend a Multiple Mini Interview (MMI). Applicants offered an interview will be able to select an interview time from a limited number of sessions on a first-come-first-served basis. During this time, applicants can cancel and reschedule within the offered session times. Once the RVSP deadline has passed, no further changes are able to be made to interview times or days.

All interviews will be conducted at the Curtin Medical School. Applicants are responsible for their own travel and accommodation arrangements.

Attendance at an interview is mandatory for selection. Interviews will only be available on dates published by Curtin Medical School. It is not possible to rearrange an interview to another date not previously published by the Curtin Medical School. All applicants should ensure they keep these dates free.

Applicants are advised to monitor the email address and phone numbers supplied to TISC as these are the details that will be used for all correspondence. It is the applicant's responsibility to ensure these details are kept up to date and monitored at all times throughout the selection process.

INTERVIEW SCHEDULE

November Interviews

Eligible Western Australian school leavers who have submitted a predicted ATAR form by the relevant deadline, Curtin course switchers and Western Australian non-school leavers will be invited to attend an interview in the November interview rounds.

January Interviews

Qualified and competitive interstate school leavers, interstate non-school leavers and those applicants whose actual ATAR renders them competitive will be invited to attend an interview in the January interview round.

Information for Interstate Applicants

As travelling to Western Australia to attend an interview is costly, applicants who live outside Western Australia will be interviewed in January.

By holding interviews in January, interstate applicants need not attend an unnecessary interview if they receive an offer at their preferred university in the first round of offers. Competitive applicants will then have the opportunity to attend January interviews at Curtin Medical School if they so wish.

All applicants will undertake the same interview process, regardless of when they are interviewed. Applicants will not be disadvantaged in any way if they are interviewed in January. Successful applicants will be made an offer in the second round.

RANKING FOR OFFER

Applicants will be ranked for offer on merit.

First and second round offers will be made directly by TISC. Curtin Medical School may make direct offers to applicants after the TISC rounds until all places are filled.

Please note: personal statements, testimonials, character/school/work references, awards and certificates do not make up any of the selection components and will not be considered. Applicants are asked not to submit these documents to the University.

Deferral Requests

Deferral requests following an offer of a place in the MBBS course will only be considered in exceptional and unforeseen circumstances (e.g. National Service).

Applicants must submit a request for deferment of a place, along with supporting documentation, within 3 working days of the offer to CMSFutureStudents@curtin.edu.au

Requests will be reviewed by the Dean of the Curtin Medical School and applicants will be advised of the outcome by email in due course.

SUCCESSFUL APPLICANTS

LOCATION

The main Curtin University campus is located in Bentley, a busy suburb approximately 20 minutes from the CBD by car. The academic office of the Curtin Medical School is located on the main campus in a new purpose-built building close to the seven other schools of the Faculty of Health Sciences.

The first three years of the course are taught at the Bentley campus, with periodic visits to clinical sites. The final years of the curriculum will be undertaken in a variety of clinical placement sites, specifically outer-metropolitan and rural sites.

Students will have the opportunity to undertake clinical placements at Midland Hospital, Royal Perth Hospital, Fiona Stanley Hospital, Peel Health Campus, Fremantle Hospital, general practice clinics across the state and rural medical settings.

ACCOMMODATION

Living on campus is a great way to get the most out of your university experience. Curtin provides a number of accommodation options for students studying at the Bentley campus.

On campus accommodation is in high demand and applicants are advised to submit an application for housing as soon as they lodge their TISC application. A valid offer is not required to reserve accommodation on campus and applicants are able to cancel your housing application at any time before semester starts, without penalty.

Please contact Housing directly to discuss your available options.

 life.curtin.edu.au/housing-and-childcare/oncampus_accommodation.htm

ORIENTATION

A medicine pre-orientation program, followed by the University official orientation week will run prior to the commencement of Semester 1. Attendance is compulsory and applicants who accept a place in the course should plan around these dates accordingly.

MANDATORY REQUIREMENTS

All Curtin Medical School owned units have compulsory fieldwork/clinical placements. Before your first fieldwork/clinical placement in week 5, Semester 1, you must complete various screenings and activities to ensure both your safety and the safety of the general public are maintained during your placement. These include:

- National Police Certificate
- First Aid Certificate ("Provide First Aid")
- Work with Children Check (2nd year requirement)
- Hand hygiene training
- Completion of stipulated health screening and immunisations (some vaccinations require multiple inoculations over a period of time so plan your schedule accordingly).

Failure to provide evidence of compliance with these requirements will prevent you from attending fieldwork/clinical placements during the first semester of the course and as a result you will be unable to complete course requirements.

You will be responsible for all costs associated with mandatory screening requirements for fieldwork/clinical placements, including vaccination and screening costs.

 healthsciences.curtin.edu.au/schools/curtin-medical-school/fieldwork/

SUCCESSFUL APPLICANT CHECKLIST

- Accept your offer.
- Complete your enrolment in ENROLNOW!
- Start working towards attaining the various Mandatory Requirements.
- Arrange housing and familiarise yourself with transportation options.
- Arrange to attend the medicine pre-orientation program and orientation week.

Information regarding this will be available in ENROLNOW! and the Student Handbook.
